

# ASW65.2

The ASW65.2 is one of the greats among the waterproof loudspeakers. It incorporates the newest acoustic technology and is amazingly powerful yet discreet. The unique curved shape produces clear, warm sound performance. Thanks to the indoor-outdoor switch, this speaker provides pure musical enjoyment, outdoors as well as indoors. In addition, the bass reflex may be hermetically sealed using the tube supplied.

The ASW65.2 is no softie though. Larger terraces, a swimming pool, ... they're all right up its street.

COLOURS white / black
