

Cinema Piano VMT

PUBLIC SPACES / HI-FI & HOME CINEMA / PROFESSIONAL AUDIO / WORKSPACES

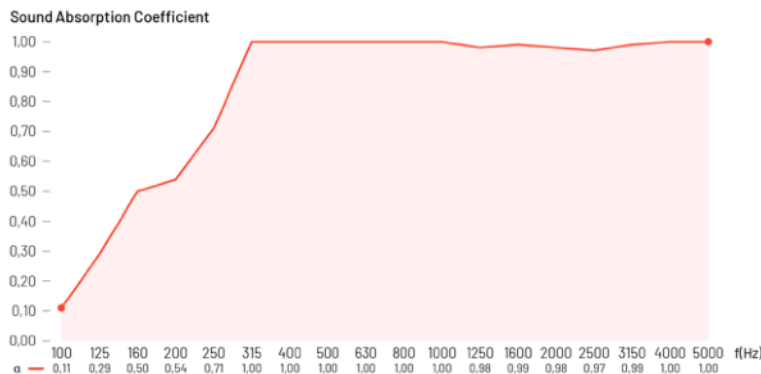

Description

The new Cinema Piano VMT panel is the standard absorber of the Cinema family, being the least thick, 60mm thickness, results in a good absorption capacity.

With the combination of the 3 Cinema panels you can create several 3D surfaces, with endless creativity design options. Furthermore, these panels are mostly made of recycled materials, in agreement with Vicoustic's sustainability compromise. The Cinema line of products is available in 6 different finishes and, since it was developed with VMT technology, the panels have the possibility to be customized.

Compatible with VicFix J profile fixation system, the panels can also be installed in the corners acting as a broadband Bass Trap, with enhanced performance in the low region.

Performance

NRC: 0.95

V2-Mar.21

Available Finishes*

VMT Colors and Patterns

* Different batches may show a color variation
